## GLOBAL RESOURCES WITH LOCAL RELATIONSHIPS AND A SINGLE POINT OF CONTACT

We formulate and install floor and wall solutions to support the diverse needs of every stadium we work in. We work with you one-on-one from individual product recommendations, colors and finishes to final walk-through.

From seating areas to kitchens, concessions and mechanical and restrooms, we deliver systems that stand up to throngs of foot and wheeled traffic, spills and splashes, and continuous cleaning. With a broad choice of colors, including custom team logos, Stonhard has solutions for everywhere you need floors.

### BENEFITS AT A GLANCE

- Manufactured and Installed. We take responsibility for products and installation
- Complete project management - we work with owners, General Contractors and design firms
- We meet your schedule and deadlines
- Fast track project? We have systems that can be installed quickly
- Our installation partners bring the expertise and meet safety regulations
- We honor the environment and offer healthy products, along with certifications such as HPDs, LEED and Mindful Materials
- OSHA Compliant

## WHY CHOOSE STONHARD SYSTEMS?

### **LONG-LASTING PERFORMANCE WITH FULLY CUSTOMIZABLE PRODUCTS DESIGNED SPECIFICALLY FOR HEALTHCARE ENVIRONMENTS**

**PERFORMANCE IS PROTECTION** - Stonhard's seamless systems provide clean, durable protection with an impact-resistant surface won't dent or gauge from heavy equipment. Our floors stand up 24/7 to continuous use - foot traffic, wheels, spills and staining and maintenance is minimal.

**ENGINEERED FOR HUMANS** - Our floors are ergonomic and easy under-foot for staff and stadium visitors who stand for hours. And floors that are seamless protect against bacteria for a sanitary environment.

**SAFE & SLIP RESISTANT** - Our systems combine slip resistance with easy-to-clean surfaces. Safety and minimizing slips and falls always a priority, while not compromising on cleanability. In addition, our floors are UV and chemical resistant so they don't dull and they stand up to spills from foods, beverages and cleaning chemicals.

**INFLUENCING COLOR** - Way-finding patterns and colors can be used to help define specific areas within a stadium, such as VIP seating, or stores. We can also install lines in safety colors to identify off-limits areas to guests.

# KEY FEATURES OF OUR TECHNICALLY-ADVANCED FORMULATIONS

## HIGH TRAFFIC RESISTANCE

Where can you find more visitors than a stadium? Not many places see the kind of activity found in stadiums. Stadium floors are found in public spaces like concourses, restrooms, and restaurants, and also behind-the-scene spaces, in areas like mechanical rooms and kitchens. All of these areas experience continuous activity. Foot traffic, wheeled carts and equipment put a great deal of demand on your floors. Stonhard's seamless, resinous floors keep operations moving with no need to shut down areas for repairs or updating. Durability and longevity give stadiums floor that work harder and last longer.

## SLIP-RESISTANT

Slip-resistant floors are designed with material properties and textures to help increase traction and keep environments safer. Stadium guests, staff, team players and entertainers will find textured floors minimize potential injuries.

## CLEAN & EASY TO CLEAN

Our floors and walls are seamless and non-porous. Seamless means there is no where for dirt and bacteria to get trapped, which means sanitary surfaces. This is critical in kitchens, food service, restrooms and locker rooms. No seams also means they are much easier to clean. In addition, these systems are chemical-resistant so they withstand continuous cleaning with sanitizing cleansers. The combination of a monolithic surface, along with stain and chemical resistance put them in demand for high-traffic spaces like stadiums.

## ERGONOMIC

Ergonomic flooring takes the art of human engineering to the next level. For designers, planners, and decision-makers, ergonomics is all about comfort. A floor that offers flexibility underfoot provides far more comfort than many common hard surfaces such as polished concrete or terrazzo. Ergonomic floors ensures visitors and staff who spend long hours on their feet get relief from fatigue and a more comfortable all-around experience.

## UV RESISTANT

Floors that resistant damaging UV exposure last longer and look better. No fading or yellowing means a longer life cycle for your floor and savings for you.

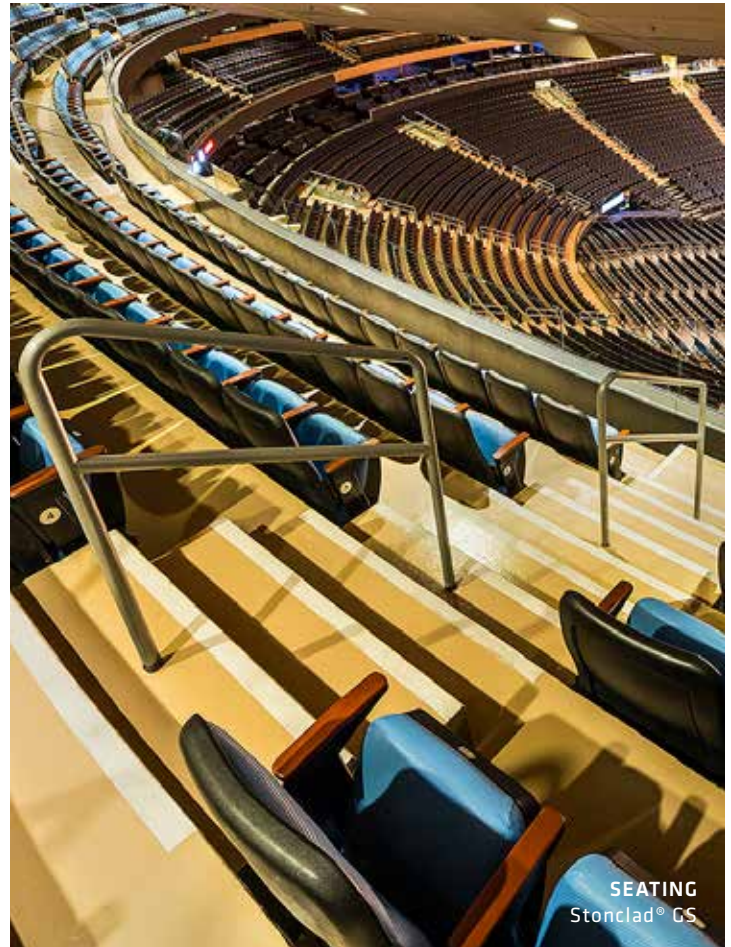

## ABRASION-RESISTANT

Abrasion-resistant flooring is designed to resist the impacts of heavy-duty use while maximizing its longevity. Heavy foot and equipment traffic, including heavy-duty cleaning equipment are commonplace in stadiums. Durability requires abrasion resistance to combat continuous exposure. They also need to stand up to dirt, grime, and routine harsh cleanings.

## CHEMICAL AND STAIN RESISTANT

When we think of chemicals we often think of industrial environments, but chemicals are found in foods, drinks and cleaners. They can stain and also cause deterioration over time to a surface. Floors that stand up to spills, splashes and industrial-grade cleaning agents stay looking good, keep areas safer and sanitary and don't require constant repairs.

**WE HAVE  
SOLUTIONS FOR  
EVERY AREA OF  
YOUR FACILITY!**

### **MORGUES**

Seamless floors means there are no open joints, cracks, or grout lines. Cost-effective solutions that provide slip-resistance, easy cleaning, and design flexibility.

### **TESTING LABS**

There is no compromising when it comes to infection control. Healthcare environments require sterile floors that are seamless, easy to clean, stain and chemical resistant which are all features of Stonhard flooring systems.

### **ENTRANCES**

Seamless and slip-resistant bonded natural aggregate grip systems are used primarily to surface outdoor areas and to repair and enhance exterior concrete damaged by salt attack.

### **LOBBIES/RECEPTION**

Make your entrance welcoming and inviting with seamless floors that produce a clean, sleek look that is highly-coveted in healthcare spaces and available in a multitude of colors, patterns, and designs.

### **OFFICES & ADMINISTRATION**

Quick-installation, seamless flooring systems get your space back to being in service with some floor installations taking as few as two days!

### **KITCHEN/FOOD PREP AREAS**

An impact-and chemical-resistant mortar floor that can handle thermal shock and cycling is ideal for kitchens and food prep areas. Accompany that with grout that is formulated specifically for the healthcare industry. Designed to repair erosion on concrete floors and for changing the level or pitch of floors to provide you with the best solution ensuring excellent hygiene along with minimal maintenance.

### **PATIENT ROOMS**

A poured-in-place, smooth-finish floor has no joints or seams for dirt and bacteria to harbor, making it easy to clean. Combine that with seamless, impact-resistant, light-stable, and flexible urethane wall systems for harsh environments like washrooms and showers.

### **HALLWAYS & CORRIDORS**

Protect your floors from wheeled or foot traffic by eliminating unnecessary joints and ridges and offering minimal maintenance and fewer repairs.

### **PUBLIC WASHROOMS**

Public washrooms need floors that can stand up to water, stains, and abrasion to prevent frequent floor repair or replacement costs.

### **HELICOPTER PADS**

Helicopter pads require a traffic coating solution that can be customized for increased stability, rigidity, moisture resistance, slip resistance and UV stability.

### ICU/EMERGENCY ROOMS

Wear-resistant formulas extend the longevity of emergency room floors. Add in a high-gloss finish and it looks great for years to come.

### WAITING ROOMS/ NURSING STATIONS

Brighter and livelier, choosing a decorative floor system that fights stains and is easy-to-clean will keep your nurses' stations and waiting rooms sterile and hygienic.

### RADIOLOGY

Floors that are self-leveling are the first choice for environments that need static control and low-friction flooring.

### FOOD COURTS

Food court floors need to be easy to clean, impact and abrasion resistant and will stand up to heavy foot traffic. Having a system that is installed quickly will avoid disruption to operations.

### MECHANICAL ROOMS

Mechanical rooms require an epoxy mortar system with superior impact, abrasion, and chemical resistance to provide serious protection and reduce maintenance.

### PARKING GARAGES

Parking garage protection systems have been designed to enhance visual appearance, improve light reflectivity, reduce noise from tire squeal and prevent water ingress into the concrete structure.

### OPERATING ROOMS

Seamless, resilient, long-lasting, stain-resistant, ergonomic, and noise-reducing flooring that combines distinctive design with function and has a specialized formulation purpose-built for operating rooms.

A modern lounge area with four pink armchairs and a white circular coffee table. In the background, a person is holding a large, circular, illuminated object. The scene is lit with recessed ceiling lights.
